

## **Database Administrator/Developer Strategic Insight - New York Office**

For more than 20 years, Strategic Insight (SI) an Asset International company has anchored competitive research and business intelligence at the heart of the mutual fund industry. Our core mission remains strengthening the mutual fund industry overall, and helping each of our clients succeed in the global marketplace. We accomplish this through our linked suite of Simfund databases, in-depth studies, Internet libraries, and on-demand research, enriched with personalized advice. SI clients are responsible for 90% of U.S. fund industry assets, and include executives among over 200 investment management and insurance companies, distributors, investment banks, hedge funds, consultants, law firms, associations, regulators and other industry participants. In the U.S. and internationally, SI's expanding global research is shared with over 50 of the world's largest and most dynamic investment and distribution firms.

We are looking for an exceptional Database Developer/Administrator to join our team. As a key member of our technology team, they will be responsible for the on-going design, development and production of our database products. They will design, analyze, develop, code, test, debug, and document technology solutions to integrate data from a variety of internal and external data sources.

### **Responsibilities:**

- Analyze, design, develop, maintain and tune large SQL Server databases.
- Design and maintain complex SSIS and T-SQL based ETL processes.
- Development of .NET applications using C# and also support other developers in use/accessing of data.
- Interact with data vendors and clients to determine requirements and specifications.

### **Requirements:**

- BA/BS Computer Science or related discipline.
- 3+ years T-SQL programming experience.
- 3+ years as Database Administrator supporting SQL Server 2005, 2008 with SAN Infrastructure and .NET development experience.
- SQL Server administration, database analysis and design, database tuning and optimization, Integration Services (SSIS), advanced SQL query capabilities.
- Good verbal and written communications skills to work with vendors and co-workers.
- Ability to learn quickly and think outside of the box.
- Experience working with Agile/SCRUM shop preferred.
- Experience in/knowledge of financial markets, brokerage or asset management industries preferred.

**Interested applicants should email a cover letter, resume and salary requirements/history to: [careers@assetinternational.com](mailto:careers@assetinternational.com)**
